?

And they are all right...

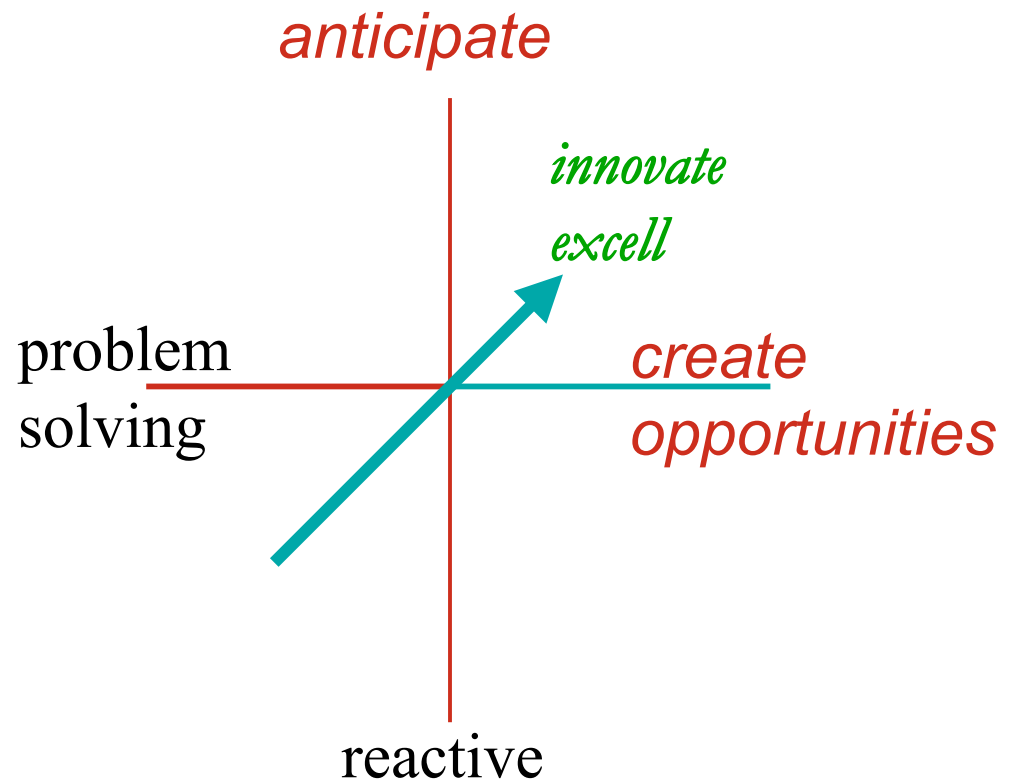

# Remembering a different future

“The impact of what we do and think is very limited by what we do *not* notice.

And because we don't notice that we don't notice, there is very little we can do to achieve a change,

until we realize that exactly the fact *that we don't notice* determines our actions and thoughts.

Provoke yourself

- Actively listen . . . always confirm your understanding of a person's idea: “do you mean ....?”

This will ensure that the idea is more clearly understood by listener and speaker alike, and the person who's speaking can **built upon** the idea throughout the interaction.

can be very **THREATENING** for the current paradigm of (members of) an organisation...

... and new ideas are very **VULNERABLE**. So they need care, protection and 'substance'. They need good **groundwork**!

All ideas are recognized and acknowledged . . . a two-way flow of communication is essential.

## **Ideas have a natural need for POWER**

Ideas must have a place to go and once they get there, people should know if they'll be used, discussed further or rejected, and why.

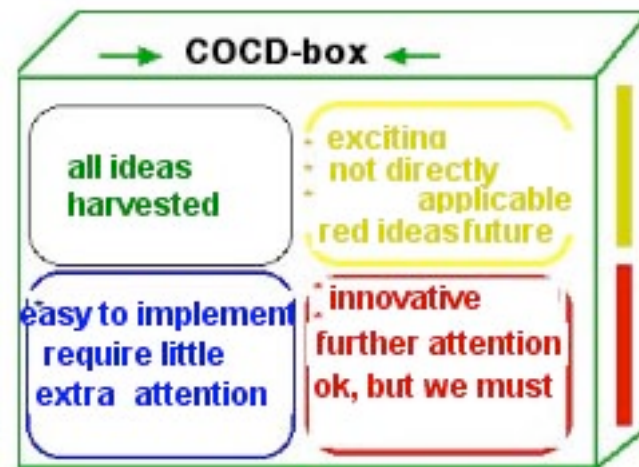

Don't throw away any ideas !

Avoid yes or no [mu]

# Backing ideas

Groundwork is giving '**POWER**' to ideas

- ❖ Don't be ridiculous
- ❖ We've already tried that.
- ❖ It will cost too much.
- ❖ We're not responsible ..
- ❖ That's too big a change.
- ❖ We don't have the time.
- ❖ That makes ... Redundant or obsolete.
- ❖ Not our problem.
- ❖ We've never tried that before.
- ❖ Let's be realistic.
- ❖ Why change? Things are going well.
- ❖ You're years ahead of your time.
- ❖ It's not in the budget.
- ❖ If it's such a good idea, why hasn't it been done before?
- ❖ Management will never fall for that.
- ❖ The supplier will never do that.
- ❖ The customer will not accept it.
- ❖ Since when are *YOU* the expert ?!
- ❖ It's not in line with policy.
- ❖ We keep it in mind / We'll get to that in future.

**Replace** "Our customers would never accept that!"  
with

*"Say more about how it would help our customers."*

**Help people bring their ideas to life.**

*Killer phrases stop ideas dead in their tracks.*

## 10 (!!!) guidelines

\* How can I avoid idea killers ?
